Original class (kept / improved)
New class (added)

LoginAttempt
-attemptId : int
-username : String
-ipAddress : String
-success : boolean
-attemptedAt : DateTime
+isSuspicious() : boolean

User
-userId : int
-email : String
-passwordHash : String
-role : String
-status : String
-createdAt : DateTime
+login()
+logout()
+resetPassword()

Session
-sessionId : String
-token : String
-ipAddress : String
-expiresAt : DateTime
+isValid() : boolean
+revoke()

Search
-source : String
-destination : String
-travelDate : Date
-passengers : int
+searchFlight()
+filterResults()

Customer
-firstName : String
-middleName : String
-lastName : String
-salutation : String
-phone : String
+updateProfile()

Admin
-adminId : int
+addFlight()
+removeUser()
+modifyBooking()

Airport
-code : String
-name : String
-city : String
-country : String
-terminal : String

MilesAccount
-number : String
-flightMiles : int
-statusMiles : int
+creditMiles()
+consumeMiles()

Booking
-bookingRef : String
-status : String
-totalPrice : float
-createdAt : DateTime
+reserve()
+pay()
+cancel()
+change()

Ticket
-ticketNo : String
-status : String
-issuedAt : DateTime
+issue()
+cancel()

Flight
-flightNo : String
-departureTime : DateTime
-arrivalTime : DateTime
-status : String
-basePrice : float
-miles : int
+delayFlight()
+closeFlight()

Aircraft
-aircraftId : int
-model : String
-capacity : int

Payment
-paymentId : int
-amount : float
-method : String
-status : String
-paidAt : DateTime
-transactionRef : String
+authorize()
+refund()

Passenger
-firstName : String
-lastName : String
-dateOfBirth : Date
-nationality : String
+getFullName()

CheckIn
-boardingGate : String
-checkInTime : DateTime
-status : String
+checkInPassenger()
+passengerBoard()

FlightSeat
-seatNo : String
-seatClass : String
-status : String
-price : float
+hold()
+release()
